# Construction is Coming To Your Area Soon

## Little Hope Creek Phase 2

**Wastewater**  
Improvement Project

OCTOBER 2022

# Little Hope Creek Wastewater Improvement Project

## Phase 2 Construction

Charlotte Water and its contractors continue to make progress on phase 2 of wastewater improvements in the area. Once completed, the project will enhance the wastewater system in the community and protect the water quality in the creek.

Construction activities will soon begin at Woodlawn Road and crews will move north along the alignment (see map). Work is expected to begin at the end of October and will take two to three months to complete.

Residents along the alignment will see varying levels of construction. Please note, construction schedules are subject to change due to weather and other conditions.

### WHAT TO EXPECT:

**Clearing** – Crews will clear trees, bushes, shrubs, fences and other structures within the easements following Little Hope Creek.

**Moving equipment on site** – Crews will move construction equipment and materials to easements along the project site throughout construction.

**Materials delivery and staging** – Pipe and concrete manhole structures are delivered and staged within the construction easements.

**Establishing a safe work zone** – Fencing will be installed around work areas and pipe will be stabilized.

**Trench digging, placing pipe and backfilling**

**Customers may feel a rumble** – Crews may remove underground rock formations by use of controlled blasting. Pre-blast surveys are conducted as requested by property owners within the designated areas of the blasting sites. Blasting is a standard construction procedure in which holes are drilled into the rock for dynamite placement and covered with packed dirt or heavy mats. A seismograph monitor records blast vibrations to verify they are within specifications. All safety precautions will be taken. Customers may hear a warning horn, a muffled noise, and slight vibration or rumble similar to a slammed door or thunder.

**Construction traffic** – Dump trucks will travel along the alignment, within the easements and roadway.

**Lane closures and detours around work** – Motorists should follow all traffic control signs and measures.

**QUESTIONS:** For updates on project progress, please visit the project website at [bit.ly/LittleHopeCreek](https://bit.ly/LittleHopeCreek) or by visiting [charlottenc.gov/littlehopecreek](https://charlottenc.gov/littlehopecreek). Additionally, we are now offering text alert notifications (see other side for details). If you have a question, please contact project manager Stephen Scott, (980) 219-9488 or [Stephen.Scott@charlottenc.gov](mailto:Stephen.Scott@charlottenc.gov).
